## 1. Introduction to Retention, Graduation, Time-to-Degree, and Undergraduate Yearly Retention Data

The tables on the proceeding pages provide the *one-year retention, graduation rate, time-to-degree, and undergraduate yearly retention* data for the San Francisco Art Institute (SFAI) from Fall 2000 to the present. Fall 2000 is the earliest term for which the institute can provide reliable data for the above measurements. For all measurements, data is disaggregated to the point where data remains relevant.

SFAI participated as a Pilot 2 institution for the Western Association of Schools & Colleges (WASC) in Spring of 2013. Pilot 2 institutions volunteered retention, graduation, and time-to-degree data for degree-seeking undergraduates based on the following WASC-defined cohorts:

**New Freshman, full-time:** First-time, full-time Bachelor's candidates entering SFAI as freshmen in Fall.

**New Freshman, part-time:** First-time, part-time Bachelor's candidates entering SFAI as freshmen in Fall.

**Transfer, lower-division:** Transfer-in Bachelor's candidates with less than 60 transfer credits.

**Transfer, upper-division:** Transfer-in Bachelor's candidates with 60 or more transfer credits.

SFAI has adopted the above undergraduate cohort designations for tracking student achievement. To describe the achievement of our graduate student population, SFAI has defined the following graduate cohorts for these measurements:

**Master of Fine Arts:** Master of Fine Arts candidates.

**Master of Arts:** Master of Arts candidates.

**Post-Baccalaureate:** Post-Baccalaureate certificate candidates.

As of 2014, WASC—now the WASC Senior College and University Commission (WSCUC)—has gone forward with completion measures that are not based on cohorts. Nevertheless, measuring student achievement based on the above cohorts provides useful and actionable data for SFAI.

Data goes back to Fall 2000 for all tables. Cohorts or degree recipients with 5 or less students have been suppressed for confidentiality. This is indicated by "small n" on fields where this is the case. Retention and Graduation Rates were not disaggregated by ethnicity for the New Freshman, Part-time; Transfer, upper-division; and Master of Arts cohorts due to small ethnic subcohorts.

Only cohorts entering in Fall terms have been measured. Time-to-degree data is based on all degrees posted for Fall-entering cohorts since 2000.
