New Tools to Overcome the Human Barriers to Change Leaders

know that their job is to transform their organizations to keep pace with technology and an ever-changing business environment. They also know that they are bound to fail in doing so. But this discouraging prospect is not because they won't be able to solve a technological or strategic problem. Leaders will fail because of intractable human responses associated with change--responses such as fear, ingrained habits, politics, incrementalism, and lack of imagination. These stumbling blocks always arise when we humans are faced with change, but what if we had a way to transcend them? This book reveals a radical new method for doing just that. Written by the executive who designed and implemented it, the neuroscientist who helped make it work, and the academic who explains why it works and how to do it, *Leading Transformation* introduces an innovative yet proven process for creating breakthrough change. Divided into three steps--envisioning the possible, breaking down resistance, and prototyping the future--this process uses cutting-edge tools such as science fiction, cartoons, rap music, artifact trails, and neuroprototyping to overcome people's inability to imagine or react to what doesn't yet exist, override powerful habits and routines that prevent them from changing, and create compelling narratives about the organization's future and how to get there. Showing how these tools have been used successfully by companies such as Lowe's, Walmart, Pepsi, IKEA, Google, Microsoft, and others, the process revealed in this book gives leaders the means to transcend the human barriers that block change and lead their organizations confidently into the future.

NEW YORK TIMES BESTSELLER • Thought leader, visionary, philanthropist, mystic, and yogi Sadhguru presents Western readers with a time-tested path to achieving absolute well-being: the classical science of yoga. "A loving invitation to live our best lives and a profound reassurance of why and how we can."—Sir Ken Robinson, author of *The Element*, *Finding Your Element*, and *Out of Our Minds: Learning to Be Creative* NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY SPIRITUALITY & HEALTH The practice of hatha yoga, as we commonly know it, is but one of eight branches of

the body of knowledge that is yoga. In fact, yoga is a sophisticated system of self-empowerment that is capable of harnessing and activating inner energies in such a way that your body and mind function at their optimal capacity. It is a means to create inner situations exactly the way you want them, turning you into the architect of your own joy. A yogi lives life in this expansive state, and in this transformative book Sadhguru tells the story of his own awakening, from a boy with an unusual affinity for the natural world to a young daredevil who crossed the Indian continent on his motorcycle. He relates the moment of his enlightenment on a mountaintop in southern India, where time stood still and he emerged radically changed. Today, as the founder of Isha, an organization devoted to humanitarian causes, he lights the path for millions. The term guru, he notes, means “dispeller of darkness, someone who opens the door for you. . . . As a guru, I have no doctrine to teach, no philosophy to impart, no belief to propagate. And that is because the only solution for all the ills that plague humanity is self-transformation. Self-transformation means that nothing of the old remains. It is a dimensional shift in the way you perceive and experience life.” The wisdom distilled in this accessible, profound, and engaging book offers readers time-tested tools that are fresh, alive, and radiantly new. Inner Engineering presents a revolutionary way of thinking about our agency and our humanity and the opportunity to achieve nothing less than a life of joy. Move over, dude!
