The Enlightenment and Religion Sep 13 2022 This publication offers a critical survey of religious change and its causes in 18th-century Europe. Focusing on Enlightenment Italy, France and England, the text illustrates how the canonical view of 18th-century religious change has in reality been constructed upon scant evidence and assumption

Barbarism and Religion Jul 31 2021 A major new sequence of works from one of the world's leading historians of ideas.

History and the Enlightenment May 17 2020 The historical philosophy of the Enlightenment -- The Scottish Enlightenment -- Pietro Giannone and Great Britain -- Dimitrie Cantemir's Ottoman history and its reception in England -- From deism to history: Conyers Middleton -- David Hume, historian -- The idea of the decline and fall of the Roman Empire -- Gibbon and the publication of the *Decline and fall of the Roman Empire* 1776-1976 -- Gibbon's last project -- The romantic movement and the study of history -- Lord Macaulay: the history of England -- Thomas Carlyle's historical philosophy -- Jacob Burckhardt.

Barbarism and Religion: Volume 4, Barbarians, Savages and Empires Oct 14 2022 'Barbarism and Religion' - Edward Gibbon's own phrase - is the title of a sequence of works by John Pocock designed to situate Gibbon, and his *Decline and Fall of the Roman Empire*, in a series of contexts in the history of eighteenth-century Europe. In the fourth volume in the sequence, first published in 2005, Pocock argues that barbarism was central to the history of western historiography, to the history of the Enlightenment, and to Edward Gibbon himself. As a concept it was deeply problematic to Enlightened historians seeking to understand their own civilised societies in the light of exposure to newly discovered civilisations which were, until then, beyond the reach of history itself.

History and Nature in the Enlightenment Jun 17 2020 The mastery of nature was viewed by eighteenth-century historians as an important measure of the progress of civilization. Modern scholarship has hitherto taken insufficient notice of this important idea. This book

discusses the topic in connection with the mainstream religious, political, and philosophical elements of Enlightenment culture. It considers works by Edward Gibbon, Voltaire, Herder, Vico, Raynal, Hume, Adam Smith, William Robertson, and a wide range of lesser- and better-known figures. It also discusses many classical, medieval, and early modern sources which influenced Enlightenment historiography, as well as eighteenth-century attitudes toward nature in general.

Politics and the Arts in Lisbon and Rome Mar 07 2022 *Dealing with a complex king, this edited collection elucidates a monarch's vision of Rome that deeply affected his political choices and cultural policy during the first half of the eighteenth-century. John V of Portugal became king in 1707 in a pivotal moment for the European balance of power. The Kingdom of Portugal was still demanding the same privileges as its powerful neighbours and the relation with Rome was considered a vehicle to obtain them. Arts and music had a special and unprecedented place in the king's plans and this book approaches that dynamic from several interdisciplinary perspectives. The unifying thread across this book's chapters remains the omnipresence of Rome as a paradigm on several levels: political, religious, intellectual, artistic, and musical. Rather than providing an exhaustive analysis of the period as a whole, this study offers a fresh approach for English readers to this classic, but little known, topic in Portuguese national historiography. Pilar Díez del Corral Corredoira is Ramón y Cajal Fellow based at the Art History department of the Universidad Nacional de Educación a Distancia (Madrid). She wrote a PhD on Classical Art and has widely published in international journals (The Burlington Magazine, Storia dell'Arte, etc). Her current research is focused on Iberian cultural identities, artistic mobility and diplomacy in Rome in the 18th Century.*

Adam Ferguson: History, Progress and Human Nature Jul 19 2020

Unique among the leading figures of the Scottish Enlightenment, Ferguson saw two eighteenth-century revolutions, the American and

the French. This monograph contains essays that range across all of Ferguson's works to investigate his engagement with contemporary events and his contributions to our understanding of history and human action.

The Enlightenment and religion Apr 15 2020 *This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This book offers a critical survey of religious change and its causes in eighteenth-century Europe, and constitutes a challenge to the accepted views in traditional Enlightenment studies. Focusing on Enlightenment Italy, France and England, it illustrates how the canonical view of eighteenth-century religious change has in reality been constructed upon scant evidence and assumption, in particular the idea that the thought of the enlightened led to modernity. For, despite a lack of evidence, one of the*

fundamental assumptions of Enlightenment studies has been the assertion that there was a vibrant Deist movement which formed the “intellectual solvent” of the eighteenth century. The central claim of this book is that the immense ideological appeal of the traditional birth-of-modernity myth has meant that the actual lack of Deists has been glossed over, and a quite misleading historical view has become entrenched.

Reform Catholicism and the International Suppression of the Jesuits in Enlightenment Europe Nov 22 2020 An investigation into the role of Reform Catholicism in the international suppression of the Jesuits in 1773 The Jesuits devoted themselves to preaching the word of God, administering the sacraments, and spreading the faith by missions in both Europe and newly discovered lands abroad. But, in 1773, under intense pressure from the monarchs of Europe, the papacy suppressed the Society of Jesus, an act that reverberated from Europe to the Americas and Southeast Asia. In this scholarly history, Dale Van Kley argues that Reform Catholicism, not a secular Enlightenment, provided the justification for Catholic kings to

suppress a society instituted by the papacy. Spanning the years from the mid-sixteenth century to the onset of the French Revolution, and the Jesuit presence from China to Brazil, this is the only single volume in English to make coherent sense of the series of expulsions that add up to what was arguably the most important religious event in Europe of the time, resulting in the secularization of tens of thousands of Jesuits.

The Intellectual Roots of the Italian Enlightenment Feb 18 2023 This work offers an examination of how Newtonian science affected the early 18th-century Enlightenment in Italy in terms of religion and politics.

Law and Justice from Antiquity to Enlightenment Jun 10 2022 This concise intellectual history of the law offers an accessible introduction to the development of law from ancient Babylon to eighteenth-century Europe. Robert W. Shaffern examines a rich array of sources to illuminate ideas about law and justice in Western civilization. Designed specifically for undergraduates to the subject, this book will be invaluable for introductory courses on the history of law and jurisprudence.

Rome in the Age of Enlightenment Aug 24 2023 This is the only scholarly work in the English language on the city of Rome in the Age of the Enlightenment, and the only book in any language to treat this fascinating city in all its multifarious aspects. Professor Gross combines extensive archival research with the latest findings of other scholars to produce a uniquely rounded portrait of the papal capital, elegantly illustrated with contemporary engravings by Piranesi and others. The book is divided into two sections, in the first of which Professor Gross discusses the material and institutional structures of the city, including its demography, economy, food supply, and judicial systems. The second section considers aspects of intellectual, cultural, and artistic life. Professor Gross contends not only that ancien-regime Rome witnessed a decline in Counter-Reformation fervour, but that this decay resulted in a marked dissonance in the political, social, and cultural life of the city.

Ancient Rome Nov 15 2022 This book tells the story of Ancient Rome from the perspective of a traveler and explains many of the customs and mores of Rome as well as providing an abbreviated history. Much of the history is told by discussing important landmarks and sights. It is a social history and a geographical handbook more than a conventional history. Ancient Rome is the progenitor of Western civilization. The customs, religion, law, technology, architecture, political system, military, literature, languages, alphabet, government and many factors and aspects of western civilization are all inherited from Roman advancements. The rediscovery of Roman culture revitalized Western civilization, playing a role in the Renaissance and the Age of Enlightenment.

Toleration in Enlightenment Europe Oct 22 2020 This 1999 book is a systematic pan-European survey of the theory, practice, and very real limits to toleration in eighteenth-century Europe.

Barbarism and Religion: Volume 3, The First Decline and Fall Oct 02 2021 'Barbarism and Religion' - Edward Gibbon's own phrase - is the title of a sequence of works by John Pocock designed to situate Gibbon, and his Decline and Fall of the Roman Empire, in a series of contexts in the history of eighteenth-century Europe. This is a major intervention from one of the world's leading historians, challenging the notion of any one 'Enlightenment' and positing instead a plurality of enlightenments, of which the English was one. The first two volumes of Barbarism and Religion were warmly and widely reviewed, and won the Jacques Barzun Prize in Cultural History of the American Philosophical Society. In this third volume in the sequence, The First Decline and Fall, John Pocock offers an historical introduction to the first fourteen chapters of Gibbon's great work, recounting the end of the classical civilisation Gibbon and his readers knew so much better than the worlds that followed.

Antiquity and Enlightenment Culture Dec 16 2022 This volume explores the place of antiquity in Enlightenment Europe. It considers the contexts, questions, and agendas that shaped eighteenth-century engagements with the ancient world, shedding new light on familiar figures and recovering forgotten chapters in this European story.

The Exemplary Hercules from the Renaissance to the Enlightenment and Beyond Feb 23 2021 The Exemplary Hercules explores the reception of the ancient Greek hero Herakles – the Roman Hercules – in European culture from the Renaissance to the Enlightenment and beyond, raising questions about his role as model of the princely ruler.

*The Culture of Architecture in Enlightenment Rome Jul 23 2023 Beginning in the 1730s, Heather Minor tells us, Rome "began to resemble one huge construction site," with a series of ambitious and expensive new building campaigns that transformed the face and substance of the city. From renovations of the Santa Maria Maggiore and San Giovanni in Laterano and the restoration of the Arch of Constantine to the creation of the Capitoline Museum and the establishment of the papacy's Calcografia, the push for reform not only renewed papal and Church identity but also revived Italian culture as a whole. Based on extensive archival research and full of fascinating stories about the often stormy theological and intellectual debates central to the attempts at reform, *The Culture of Architecture in Enlightenment Rome* brings to life the personalities of architects, theologians, and intellectuals and links the extensive architectural programs with powerful shifts in the intellectual climate of the time.*

Italy's Eighteenth Century Sep 01 2021 In the age of the Grand Tour, foreigners flocked to Italy to gawk at its ruins and paintings, enjoy its salons and cafés, attend the opera, and revel in their own discovery of its past. But they also marveled at the people they saw, both male

and female. In an era in which castrati were "rock stars," men served women as cicisbei, and dandified Englishmen became macaroni, Italy was perceived to be a place where men became women. The great publicity surrounding female poets, journalists, artists, anatomists, and scientists, and the visible roles for such women in salons, academies, and universities in many Italian cities also made visitors wonder whether women had become men. Such images, of course, were stereotypes, but they were nonetheless grounded in a reality that was unique to the Italian peninsula. This volume illuminates the social and cultural landscape of eighteenth-century Italy by exploring how questions of gender in music, art, literature, science, and medicine shaped perceptions of Italy in the age of the Grand Tour.

Adam Ferguson in the Scottish Enlightenment Jan 17 2023 *Unlike his contemporaries, who saw Europe's prosperity as confirmation of a utopian future, the Scottish Enlightenment philosopher Adam Ferguson saw a reminder of Rome's lesson that egalitarian democracy could become a self-undermining path to dictatorship. This is a major reassessment of a critic overshadowed today by David Hume and Adam Smith.*

Neoclassicism Apr 08 2022 *In the arts, Neoclassicism is a historical tradition or aesthetic attitude based on the art of Greece and Rome in antiquity. The movement started around the 18th-century, age of*

Enlightenment, and continued into the early 19th-century The general credo associated with the aesthetic attitude of Classicism was that art had to be rational and therefore morally better. Neoclassicists also believed that art should be cerebral, not sensual and therefore characterised by clarity of form, sober colours and shallow space. It was a reaction against both the surviving Baroque and Rococo styles, and a desire to return to the perceived "purity" of the arts of Rome. The important artists of the movement include the sculptors Antonio Canova, Jean-Antoine Houdon and Bertel Thorvaldsen, and the painters J.A.D. Ingres, Jacques-Louis David and Anton Raphael Mengs.

Jewish German Revolution Sep 20 2020 Ideas that survived Roman imperialism surfaced in Renaissance and Enlightenment. The forces that kept them alive despite the most ferocious opposition by Rome consisted largely of German tribes and Jews. This is the monumental story of the struggle to preserve democracy for civilization.

The Founders and the Classics May 21 2023 Is our Greek and Roman heritage merely allusive and illusory? Or were our founders, and so our republican beginnings, truly steeped in the stuff of antiquity? So far largely a matter of generalization and speculation, the influence of Greek and Roman authors on our American forefathers finally becomes clear in this fascinating book-the first comprehensive study of the founders' classical reading. Carl J. Richard begins by examining how eighteenth-century social institutions in general and the educational system in particular conditioned the founders to venerate the classics. He then explores the founders' various uses of classical symbolism, models, "antimodels," mixed government theory, pastoralism, and philosophy, revealing in detail the formative influence exerted by the classics, both directly and through the mediation of Whig and American perspectives. In this analysis, we see how the classics not only supplied the principal basis for the U.S. Constitution but also contributed to the founders' conception of human nature, their understanding of virtue, and their sense of identity and purpose within a grand universal scheme. At the same

time, we learn how the classics inspired obsessive fear of conspiracies against liberty, which poisoned relations between Federalists and Republicans. The shrewd ancients who molded Western civilization still have much to teach us, Richard suggests. His account of the critical role they played in shaping our nation and our lives provides a valuable lesson in the transcendent power of the classics.
