What I Talk About When I Talk About Running Jul 30 2021 From the best-selling author of *The Wind-Up Bird Chronicle* and *After Dark*, a rich and revelatory memoir about writing and running, and the integral impact both have made on his life. In 1982, having sold his jazz bar to devote himself to writing, Haruki Murakami began running to keep fit. A year later, he'd completed a solo course from Athens to Marathon, and now, after dozens of such races, not to mention triathlons and a slew of critically acclaimed books, he reflects upon the influence the sport has had on his life and—*even more important*—on his writing. Equal parts training log, travelogue, and reminiscence, this revealing memoir covers his four-month preparation for the 2005 New York City Marathon and includes settings ranging from Tokyo's Jingu Gaien gardens, where he once shared the course with an Olympian, to the Charles River in Boston among young women who outpace him. Through this marvellous lens of sport emerges a cornucopia of memories and insights: the eureka moment when he decided to become a writer, his greatest triumphs and disappointments, his passion for vintage LPs, and the experience, after the age of fifty, of seeing his race times improve and then fall back. By turns funny and sobering, playful and philosophical, *What I Talk About When I Talk About Running* is both for fans of this masterful yet guardedly private writer and for the exploding population of athletes who find similar satisfaction in distance running.

The Focus, Vol. 2 May 08 2022 Excerpt from *The Focus, Vol. 2: February, 1912* And here the little gray lady awaited the coming of her lover. Dainty she looked in her Quaker dress, and very Winsome. 'twould not be long before he came and well she knew. She heard his voice ringing through the forest stillness; he was calling her, calling her, but an imp of perversity seized her. She would make him hunt for her and he would be all the gladder when he found her. Very slim and demure, she sat in the crotch of an old tree. Her bright brown eyes danced mischievously as he called, first with only love in his voice, then anxiously, then with a frantic appeal that softened her heart, but before she could answer there came a timid reply from away in the cool dimness of the forest gloom. Focus on Them Mar 06 2022 Perfect the Skills to Excel as a Manager An engagement crisis, a management skill shortage, a retention problem—call it what you will, today's research and workplace insights emphasize that many employees leave managers. . . not companies. Good managers know they need to deliver results to be successful. But great ones? They understand the essence of managing encompasses something more: making connections, embodying the right skills, and developing their direct reports. They also realize managing well takes practice. With *Focus on Them*, you'll get the tools and know-how to excel as a manager. Edited by the Association for Talent Development's own management authority Ryan Changcoco, research expert Megan Cole, and content developer Jack Harlow, this book explores ATD's new management framework—the ACCEL model. Each chapter, written by a leader in management and talent development, focuses on one of the five skills all managers need: Accountability (Timothy Ito) Communication (Ken O'Quinn) Collaboration (Winsor Jenkins) Engagement (Hunter Haines) Listening and assessing (Michele Nevarez) By investing in your own development—boosting your ACCEL skills—you signal to your employees that you're serious about their development and learning, too. Becoming a manager isn't climbing a mountain. By focusing on the basics, you can transform from a results-oriented manager to the super people manager your employees need.

Focus: The Art of Clear Thinking Apr 19 2023 Focus is natural. We are born with an instinct to focus on exactly what we want and a very strong pair of lungs to help us to get it. Then, somewhere along the way, we begin to lose that focus. In the digital age we are bombarded with information from all angles and live our lives at such a breakneck pace that it sometimes seems that our lives are completely out of our control. In three easy steps this book teaches the reader how to regain control through the art of clear thinking: 1) FOCUS eliminate information overload 2) TRANSFORM negative thinking into positive action 3) THINK CLEARLY in the moment The author shows how you can use this strategy to achieve your goals in work and in life.

Focus Jun 09 2022 A step-by-step, sustainable plan for managing your energy bandwidth by intentionally prioritizing your health, family, career, passions, and desires, now in paperback. In our unpredictable and continually changing world, time never seems to be on our side, and if anything, it often seems out of our control. But what if it wasn't? What if you had the ability to take control of how you trade your energy for time and increase your body's "energy budget" to live your fullest life? Pedram Shojai, O.M.D., New York Times best-selling author of *The Urban Monk*, shares his time-tested system for managing your health, family, career, passions, and desires through 100-day gongs. Originating from ancient traditions and with a framework refined throughout Shojai's 15-plus years of coaching, this 100-day system provides a foundation for: Managing your expectations for your time now versus your time to come Allocating the time you have in order to get more Finding the balance between doing versus being Tapping into your vitality's highest potential Making sure your life aligns with your priorities With detailed guidance and meaningful exercises broken down into doable tasks, you will be able to develop a personalized plan for tending to your Life Garden and allowing your life's profound meaning and essential nature to flourish with abundance.

***Living into Focus* May 20 2023** In today's high-speed culture, there's a prevailing sense that we are busier than ever before and that the pace of life is too rushed. Most of us can relate to the feeling of having too much to do and not enough time for the people and things we value most. We feel fragmented, overwhelmed by busyness and the tyranny of gadgets. Veteran pastor and teacher Arthur Boers offers a critical look at the isolating effects of modern life that have eroded the centralizing, focusing activities that people used to do together. He suggests ways to make our lives healthier and more rewarding by presenting specific individual and communal practices that help us focus on what really matters. These practices--such as shared meals, gardening, hospitality, walking, prayer, and reading aloud--bring our lives into focus and build community. The book includes questions for discernment and application and a foreword by Eugene H. Peterson.

Developing Questions for Focus Groups Aug 31 2021 Volume 3 of this series describes a practical process for identifying powerful themes, & offers a clear strategy for translating these themes into questions. It also makes the process of developing good questions a practical proposition.

Make Time Sep 12 2022 From the New York Times bestselling authors of *Sprint* comes "a unique

and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, "The best way to spend this time is by cramming it full of meetings!" or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned "design sprint," Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., *Make Time* will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

The Focus of Our Faith Dec 15 2022 FOCUS IS IMPORTANT. The better your focus, the more clearly you can see. But it is important that your focus be on the right thing because your direction will follow your focus. When your focus is clear and on the right thing, then you will be heading in the right direction. The gospel of our faith is the good news that the kingdom of God has come and Jesus is the Messiah, God's anointed King. He is the focus of our faith — not only the One upon whom we fix our attention but also the One through whom we view the whole world, to see more clearly and understand God's purpose with greater wisdom. That is what Paul's letter to the Jesus believers at Colosse is about. This book is a study of that letter. In it you will learn about: • The blessing and inheritance God has for you • The divine power trio: faith, hope and love • A walk that is worthy, a life that is pleasing and fruitful • Knowing God more and more • How all things hold together • Where all divine fullness dwells • The reconciliation of heaven and earth • The good news of God's pleasure • The revelation of divine glory in you • Being rooted and built up in Jesus • The powers that have been disarmed • Living from a higher realm • The Word that qualifies us • Clothes for your new life • New life at home and in the community of faith • The

spiral of watchful, thankful prayer • Walking in wisdom... and more These are “bite-size” studies to help guide you through Paul’s letter, a little at a time. At the end of each study are focus questions to help you think further about the truths Paul brings. They are open-ended questions to allow for maximum personal reflection and group discussion.

Developing Focus Group Research May 28 2021 This book critically examines the potential of, and suggests ways forward in, harnessing a versatile and powerful method of research - focus groups. The book challenges some of the emerging orthodoxies and presents accessible, insightful and reflective discussions about the issues around focus group work. The contributors, an impressive group of experienced researchers from a range of disciplines and traditions, discuss different ways of designing, conducting and analyzing focus group research. They examine sampling strategies; the implications of combining focus groups with other methods; accessing views of ‘minority’ groups; their contribution to participatory or feminist research; use of software packages; discourse anal

Focus Apr 14 2020 Fashion photographers sold not only clothes but ideals of beauty and visions of perfect lives. Gross provides a rollicking account of fashion photography's golden age-- the wild genius, ego, passion, and antics of the men (and a few women) behind the camera, from the postwar covers of Vogue to the triumph of the digital image. He takes you behind the scene of revolutionary creative processes-- and the private passions-- of these visionary magicians.

Focus on the 5: Join the Movement Apr 07 2022 Focus on the 5 introduces a new, innovative concept to the World that is the backbone of the 5%er Movement. I'm sure you're thinking "what the heck is a 5%er?" well, they are out-of-the-box thinkers, entrepreneurs, early adopters, disruptors, founders, visionaries, inventors & risk takers. We believe 5% of the population have this in their DNA. That's why they start companies, invent things and change the World. The sad thing is the other 95% misunderstand them and some even go so far as to try and limit 5%ers. Focus on the 5 provides the platform for 5%ers to be true to themselves! There are psychological, spiritual + financial benefits for everyone in understanding this fundamental core of how and why we make decisions. "This book inspires the 5%er in all of us. Obviously some come by it naturally, some need motivation to become their destiny. I hope this book motivates leaders for generations to come!"- LES GARLAND Inventor & Founder of MTV: Music Television & VH1

The Architecture of Focus Mar 26 2021 This collection investigates the architecture of focus in linguistic theory from different theoretical perspectives. Research on focus and information structure in the last four decades has shown that the phenomenon of focus is highly complex, the theoretical approaches manifold, and the data highly sensitive. The main emphasis has been placed on the integration of the notion of focus in generative grammar. In recent years, however, the approaches to focus and information structure underwent a radical change in perspective. The theoretical concept of focus, its related terms and phenomena became the object of research.

Along with it, the research questions shifted: instead of locating focus in the architecture of grammar, linguists investigate the architecture of focus itself. The central underlying idea of this collection is to document this change in perspective with the aim of isolating essential keystones and research areas in both the theoretical and empirical domain. The book is structured accordingly. Following the introduction, there are four main sections: The general section discusses the theoretical foundations of focus within grammar. The second section hosts papers which investigate the representation of focus and topic at the syntax-pragmatics interface. The third section discusses the phonological representation of focus and its relation to meaning. The papers of the final section investigate different types of focus constructions in a variety of languages. The collection of papers on the architecture of focus, its interpretation and representation mirror the establishment of the focus research field.

Focus Mar 18 2023 What's the secret to a company's continued growth and prosperity? Internationally known marketing expert Al Ries has the answer: focus. His commonsense approach to business management is founded on the premise that long-lasting success depends on focusing on core products and eschewing the temptation to diversify into unrelated enterprises. Using real-world examples, Ries shows that in industry after industry, it is the companies that resist diversification, and focus instead on owning a category in consumers' minds, that dominate their markets. He offers solid guidance on how to get focused and how to stay focused, laying out a workable blueprint for any company's evolution that will increase market share and shareholder value while ensuring future success.

Focus Jun 21 2023 In this 2nd edition of *Focus: Elevating the Essentials to Radically Improve Student Learning*, Mike Schmoker extends and updates the case that our schools could be on the cusp of swift, unparalleled improvements. But we are stymied by a systemwide failure to simplify and prioritize; we have yet to focus our limited time and energy on the most essential, widely acknowledged, evidence-based practices that could have more impact than all other initiatives combined. They are: simple, coherent curricula; straightforward, traditional literacy practices; and lessons built around just a few hugely effective elements of good teaching. As Schmoker demonstrates, the case for these practices—and the need for them—has grown prodigiously. In every chapter, you'll find late-breaking discoveries and practical advice on how to simplify the implementation of new state standards in the subject areas; on the hidden pitfalls of our most popular, but unproven instructional fads and programs; and on simple, versatile strategies for building curriculum, planning lessons, and integrating literacy into every discipline. All of these strategies and findings are supported with exciting new evidence from actual schools. Their success confirms, as Michael Fullan writes, that a focus on the best "high-leverage practices" won't only improve student performance; they will produce "stunningly powerful consequences" in our schools.

Focus Groups in Social Research Apr 26 2021 There is an increasing divergence of focus group practice between social researchers and commercial market researchers. This book addresses the key issues and practical requirements of the social researcher, namely: the kinds of social research issues for which focus groups are most and least suitable; optimum group size and composition; and the designing of focusing exercises, facilitation and appropriate analysis. The authors use examples, drawn from their own focus groups research experience, and provide exercises for

further study. They address the three main components of composition, conduct and analysis in focus group research and also acknowledge the increasing impact the Internet has had on social research by cover

***The Grammar of Focus* Feb 05 2022** The grammar of focus has been studied in generative grammar from its inception. It has been the subject of intense, detailed cross-linguistic investigation for over 20 years, particularly within the Principles and Parameters framework. It is appropriate at this point, therefore, to take stock. Appraisal at this particular point is all the more legitimate because it comes at a time of general evaluation of the results of the profound activity that has characterized the Principles and Parameters framework. This general assessment has produced a radical new direction within that framework. The volume starts off with an introductory chapter that aims to provide an outline for the assessment, to be followed by an overview of the evolution of the study of focus in generative grammar, and a recapitulation of the principal issues associated with focus. These issues are taken up in the remaining chapters of the book, where various grammatical means of marking focus (as well as grammaticalization of focus marking) are analyzed in a wide variety of languages.

***Stolen Focus* Jan 04 2022 NEW YORK TIMES BESTSELLER • Our ability to pay attention is collapsing. From the New York Times bestselling author of Chasing the Scream and Lost Connections comes a groundbreaking examination of why this is happening—and how to get our attention back. “The book the world needs in order to win the war on distraction.”—Adam Grant, author of Think Again “Read this book to save your mind.”—Susan Cain, author of Quiet WINNER OF THE PORCHLIGHT BUSINESS BOOK AWARD • ONE OF THE BEST BOOKS OF THE YEAR: The Wall Street Journal, Financial Times, New York Post, Mashable, Mindful** In the United States, teenagers can focus on one task for only sixty-five seconds at a time, and office workers average only three minutes. Like so many of us, Johann Hari was finding that constantly switching from device to device and tab to tab was a diminishing and depressing way to live. He tried all sorts of self-help solutions—even abandoning his phone for three months—but nothing seemed to work. So Hari went on an epic journey across the world to interview the leading experts on human attention—and he discovered that everything we think we know about this crisis is wrong. We think our inability to focus is a personal failure to exert enough willpower over our devices. The truth is even more disturbing: our focus has been stolen by powerful external forces that have left us uniquely vulnerable to corporations determined to raid our attention for profit. Hari found that there are twelve deep causes of this crisis, from the decline of mind-wandering to rising pollution, all of which have robbed some of our attention. In *Stolen Focus*, he introduces readers to Silicon Valley dissidents who learned to hack human attention, and veterinarians who diagnose dogs with ADHD. He explores a favela in Rio de Janeiro where everyone lost their attention in a particularly surreal way, and an office in New Zealand that discovered a remarkable technique to restore workers’ productivity. Crucially, Hari learned how we can reclaim our focus—as individuals, and as a society—if we are determined to fight for it. *Stolen Focus* will

transform the debate about attention and finally show us how to get it back.

The status of water use efficiency and productivity with a focus on paddy rice in Sri Lanka Nov 02 2021 Global water demand is likely to grow in the next 20 to 30 years due to agriculture intensification, population growth, urbanization, and climate change. In Sri Lanka, one-third of the rural population depends on agriculture. Rice is the national staple food which is cultivated twice a year on more than half a million hectares of land under a range of physical and environmental conditions. Despite being self-sufficient in rice production, Sri Lanka has low levels of water productivity and water use efficiency in paddies. Furthermore, its water and food security is extremely vulnerable to climate change. The Food and Agriculture Organization of the United Nations (FAO) has been active to increase the understanding of the status of water use efficiency and water productivity in Sri Lanka through the project “Efficient Agricultural Water Use and Management Enhancement in Paddy Fields”, funded by the Japanese Ministry of Agriculture, Forestry and Fisheries (MAFF). The project objective is to identify limits and potentials of paddy rice production at national level. The project findings presented in this report are a basis for assisting the country with the evaluation of the status of water use efficiency and water productivity of paddy fields, providing technical and policy support to enhance water resources management in Sri Lanka.

[A Focus of Discoveries](#) Jun 28 2021 In 1887, the Physikalisch-Technische Bundesanstalt (PTB) was originally founded as the Physikalisch-Technische Reichsanstalt (PTR) in Berlin in order to promote basic research in physics. It subsequently developed into the largest research center worldwide as a place where scientists could concentrate exclusively on their research subject, and served as a model for similar institutes established in other countries. Within a very short time, the PTR produced extremely important scientific results that cemented its international position at the top, such as Max Planck's radiation law and energy quantization theory as well as Walther Meissner's discovery of the Meissner effect which represented a turning point in the field of superconductivity. This book describes the scientific and industrial milieu of the time, and explains in detail the role of the key people, including Albert Einstein's involvement with the PTR. A brief discussion on how the PTR was affected by the Nazi dictatorship in Germany is also given. On the special occasion of the 125th anniversary in 2012 of the PTB and its predecessor PTR, this second edition is presented (in CD) with a new chapter on the current impact of quantum standards.
