# Understanding the Frequency Report

The Frequency Report contains questions with fixed response options. For more detailed information, the Codebook contains a complete list of variables, survey questions, response options, and the logic used to determine which alumni received each question.

## Questions

An abbreviated version of the questions on the SNAAP Questionnaire.

## Topic Area

Each section represents a different topic area of the SNAAP Questionnaire.

## Your Respondents

The number and percentage of your alumni selecting a certain response for each question. If you also participated in 2011, responses for 2011 and 2012 have been combined.

## Education Level

Your report is representative of a specific education level (High School, Undergraduate, or Graduate).

## Variable

These variable names are labels assigned to each survey question in the data set. The variable name allows easy reference to the Codebook, which includes each variable name, the complete questions asked, the response options available, and the logic determining which alumni received each question.

## Skipped Numbers

This indicates open-ended questions which can be found in the "Alumni Comments" Report or demographic items found on the "Respondent Characteristics" Report.

## Response Options

Response options for each particular question.

## Italicized Response Options

Due to the dynamic nature of the SNAAP Questionnaire, not all alumni received every question. This italicized line (or lines) indicates the number and percentage of alumni who did not receive the question and why they did not receive it. For more detailed information on why they did not receive each item, please see the Codebook.

## Comparison Groups

The number and percentage of alumni at all institutions in each of the three comparison groups. The first two columns are selected groups and the third is all SNAAP schools at this level. You were allowed to select institutions from both the 2011 and 2012 SNAAP administrations. All three comparison groups exclude your alumni. For more details regarding institutions included in each column, see your "Comparison Group" Report.

## Dashes

For questions where alumni could check more than one response option, dashes are used because percentages can total more than 100%.

## How to Interpret Percentages

All percentages are presented as the percent of all alumni at a given education level, including those that did not receive the question.

For example, here we might say that 9% of all Sample Institution's undergraduate alumni publicly perform or exhibit their art in their personal time 1 or 2 times per year. This includes the 23% that did not receive the question because they do not make or perform art in their personal time.

Frequencies for some questions (marked with footnote "d") have been reproduced with only those respondents who received the question. These can be found in the "Data Highlights" Report.
